

README

CMPT 363 - User Interface Design

Instructor: Dr. Parmit Chilana

Assignment 5

Team Members (Team 6)

- Arsalan Macknojia | amacknoj@sfu.ca
- Akshay Nanda | akshayn@sfu.ca
- Toren Darby | tdarby@sfu.ca
- Diogo Gimenes | dgimenes@sfu.ca
- Mehrshad Matin | mmatin@sfu.ca

Instructions

1. Go to Balsamiq website: <https://balsamiq.cloud/>
2. Create a new account or login with an existing account.
3. Create a new project space by hitting the '+' sign in the top left corner.
4. Access the project space and hit the upload button in the top left corner to upload 'final prototype' BMPR file.
5. Click on the prototype project.
6. Press 'CTRL + F' or the play button in the top right corner to begin the presentation.
7. Click the highlighted links displayed on each page to navigate the prototype.

Markup notes are used both to describe changes and to direct you through example tasks, demonstrating in-depth functionality.

It is important that you only take links as directed for the prototype to ensure that the script is properly causal. If an incorrect link is taken, please navigate back using the back arrow in the top left of balsamiq.
